[www.royalmarsden.nhs.uk/conferences](http://www.royalmarsden.nhs.uk/conferences)

Thursday 21 - Friday 22 November 2019

This workshop will provide trainee surgeons, established robotic surgeons and leaders in the field an overview of the current status of robotics in head and neck surgery. The course will be populated with panel discussions and keynote lectures from an expert faculty. The emphasis will be on multi-disciplinary management while at the same time providing extensive tips on practical applications of the new and nascent technology. From the applications for robotics in diagnostics all the way through to advanced applications such as for recurrent cancers and reconstruction, and the use of robotics in neck surgery, all taught by world renowned experts in the field, this will be a one stop shop for surgeons who are embarking on robotic surgery in head and neck or who have a well-established practice.
